

Life begins outdoors

The 2025 collection

Founding in Bavaria 1997, **tfk** is a world-renowned pram manufacturer. Developing high quality, safe and sporty strollers for families with an active lifestyle has been our vision since inception. For over 25 years, the **tfk** kangaroo has stood for quality worldwide.

Unique to **tfk** - Trends for Kids - is our philosophy; a pram can be more than a means of transport for children. The slogan of our family-run brand is *'life beings outdoors'*, encouraging parents to explore the world with their young families. Our trademark has always been the all-terrain 3 wheeler, which is now being complemented by the mono4 - a 4 wheel pushchair suitable for the city - which will make the hearts of all fashionistas beat faster.

Urban Lifestyle
– functional, comfortable, safe –
developed by parents for parents.

Innovation, closeness to nature, environmental awareness, high quality and a sporty lifestyle are the cornerstones of the **tfk** brand.

The brand is currently undergoing monumental growth. We also want to inspire families in cities - who share our values - by incorporating their urban lifestyle and practicality into the new collection. The modern 2025 range has focused on style, fashion and functionality - producing a modern and premium collection, without forgetting the origins of **tfk**.

Tradition obliges.

The tfk configurator

mix & match by tfk

Three frames – Infinite variations

COMPATIBLE

The frame, wheels (tfk pro only with air wheels), combi and sports unit can all be combined and ordered in a wide range of variants.

INDIVIDUAL

Everyone can put together their own customised model according to their own needs and wishes.

ACCESSIBLE

The configurator is supported by AR (augmented reality), so you can view your design in 3D on your smartphone, tablet or PC and test whether the pushchair fits in your car boot or hallway.

Travelling with your big brother or sister?
Then grab our **velobaby** right away.
You can use it as a single seat and/or sibling version.

velobaby

The lightest car seat on the market

The **tfk Pixel PRO 2.0C by Avionaut** weighs only 2.5kg!

The headrest and modular insert of the **tfk Pixel PRO 2.0C by Avionaut** is equipped with the new Cloud Care system made of memory foam - an extremely elastic material that perfectly absorbs any stress and adapts to your child's head. Thanks to a patented solution, the shell of the **tfk Pixel PRO 2.0C by Avionaut** is made from a single piece of environmentally friendly EPP. This ensures the special lightness of only 2.5 kg and a completely new design.

The special two-piece insert cushion encourages the natural squatting position of the newborn. This prevents hip dysplasia, breathing problems and reflux. With the additional side impact protection directly on the infant car seat, the Dynamic Stress Shield, your child is particularly well protected in the event of a side collision. The canopy is made of fabric with a UV filter, providing your little one with effective protection from the sun and other external influences.

color variants

You can securely fasten the **tfk Pixel PRO 2.0C by AVIONAUT** in your car using the belt or - even better - with the matching isofix attachment point.

Original customisation options

- everything from a single source

We offer you numerous useful accessories that extend the functionality of our pushchairs according to your wishes.

The **rocker** adapter, as an addition to the combi unit (carrycot & seat) of the **tfk mono3**, **mono4**, **pro** or **duo2**, ensures a comfortable rest at home too. Simply place the carrycot on the bouncer adapter and rock your baby gently to sleep.

Whether footmuff, car seat adapter, changing bag, the summer cover for the seat or the city bag - all accessory options are developed by parents for parents.

Further extensive accessory options and spare parts for all our pushchairs, as well as your local specialist retailer, can be found online at
